For Immediate Release

Crystal Point and XYPRO announce compatibility of XYPRO's encryption technology software in OutsideView 8.0

Crystal Point, the world's leading provider of desktop connectivity software for NonStop systems, and XYPRO, a leading supplier of security software for HP NonStop systems – today announced the compatibility of Crystal Point's OutsideView 8.0 and XYPRO security and encryption solutions. The companies have completed compatibility testing and the products work together seamlessly.

"We understand the importance of security in a NonStop environment and we want to give our customers as many options as possible," said Chris Smith, President and CEO of Crystal Point. "That's why we assure that OutsideView 8.0 is compatible with the leading NonStop SSL and SSH providers." OutsideView 8.0 is a major new release of Crystal Point's host connectivity solution and provides the performance, security, productivity and control required by today's demanding NonStop business operations. "We are pleased that XYPRO and Crystal Point customers can immediately benefit from both companies technologies," said Smith.

"XYPRO has worked closely with Crystal Point to ensure compatibility of our encryption technology and platform security product lines," noted Lisa Partridge, Vice President of Sales and Marketing for XYPRO Technology. "HP NonStop is a state of the art platform and partnering with Crystal Point serves to facilitate security and compliance for our customers' mission-critical operations." XYPRO partners with companies like Crystal Point to ensure our mutual clients can truly take advantage of "best of breed" technology in the NonStop software market.

About XYPRO Technology Corporation

XYPRO builds and supports security software especially designed to protect HP NonStop Servers and the massive amounts of critical business data these systems manipulate, manage, store and transport around the clock and around the globe. XYPRO products and services cater to large and very large companies across the spectrum of industries. These include financial, healthcare, retail, telecommunications, manufacturing and energy companies who, in turn, serve and must protect sensitive data about millions of individual consumers. About Crystal Point

For more than twenty years, Crystal Point has been recognized as the worldwide leader in desktop-to-NonStop connectivity software solutions. Crystal Point developed the original Tandem terminal emulator (TTE) and evolved it into its flagship product, OutsideView. OutsideView continues to be the #1 NonStop 6530 connectivity solution, used by more Fortune 500 companies than any other product of its kind.
