

A Useful Feature You May Not Know About

#4 Enhanced Session Bar Color Coding for Status

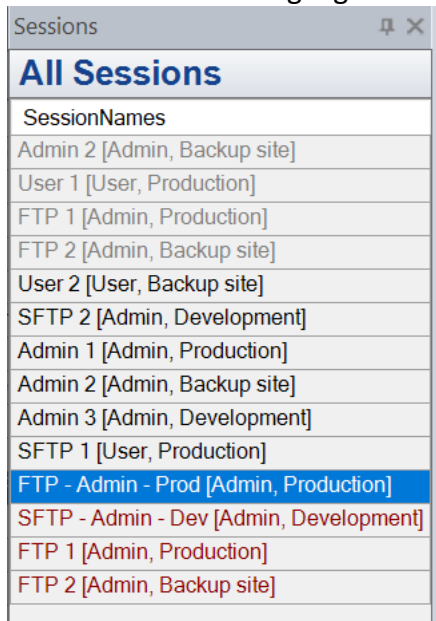

Sessions can be loaded, connected, and disconnected.

Loaded sessions are colored grey.

Connected sessions are colored black.

Disconnected sessions are colored red.

An active session is highlighted.

The screenshot shows a window titled 'Sessions' with a close button. Below the title bar is a header 'All Sessions'. The main content is a list of session names, each followed by its status in brackets. The sessions are color-coded: grey for loaded, black for connected, red for disconnected, and blue for active. The active session 'FTP - Admin - Prod [Admin, Production]' is highlighted in blue.

SessionNames
Admin 2 [Admin, Backup site]
User 1 [User, Production]
FTP 1 [Admin, Production]
FTP 2 [Admin, Backup site]
User 2 [User, Backup site]
SFTP 2 [Admin, Development]
